

IMedTM Products

Product Catalog

Integrated Medical Systems' (IMS) private label line, IMed Products™, offers a broad range of high quality and cost-effective medical disposables spanning across many product categories. Strategically cultivated to help offset the continuation of rising costs, IMed Products promotes a standardized approach to products and pricing. We are constantly adding and updating our product line to best align with our customers' evolving wants and needs.

IMed Products™ durable pouches are economical and stylish for patients receiving outpatient infusion therapies via elastomeric pumps; ideal for patients on the go. Perfect for use with EZ-FLOW Elastomeric Pumps!

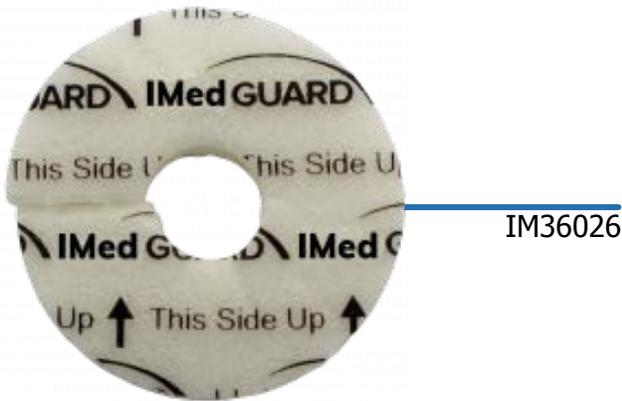

Item #	Description	Size	UOM
IM58010	IMed Elastomeric Pump Pouch	Holds up to 200mL	1/Each
IM58011	IMed Elastomeric Pump Pouch	Holds up to 500mL	1/Each

The IMed Guard is a sterile, single-use disposable disc infused with the antimicrobial agent chlorhexidine gluconate (CHG) to reduce contamination of the dressing by inhibiting microbial growth and colonization of the dressing.

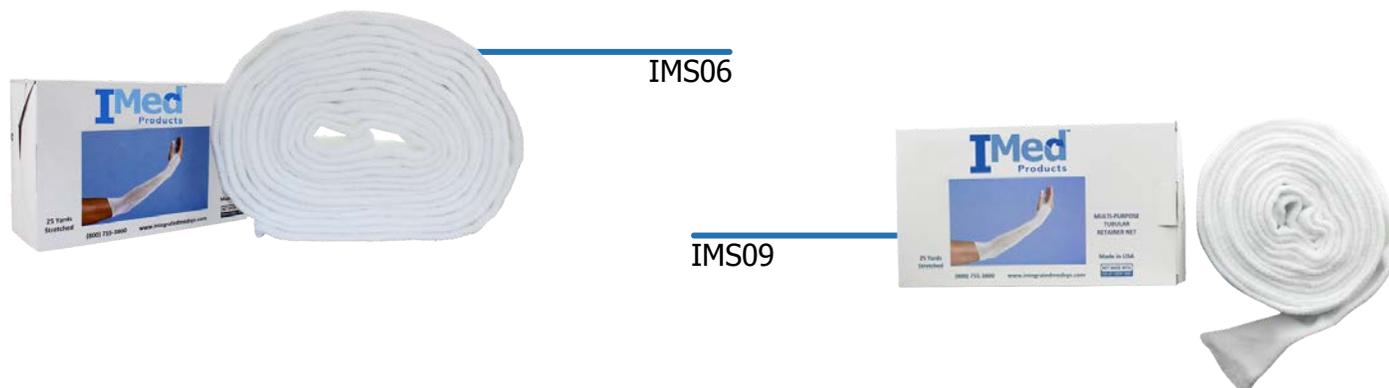

PRODUCT FEATURES:

- Beveled edges to reduce potential for catheter kinking and securement
- Soft material to reduce skin irritation/abrasion
- 38% higher absorbency of foam than market-leading product
- Pyrogen and latex-free
- IMed Guard has undergone applicable in-vitro, biocompatibility, sterility, and performance testing for safety and effectiveness

Item #	Description	UOM
IM36026	IMed Guard, 1" (4mm) Disc with CHG	10/Box

IMed Products™ Elastic Net Retainer Dressings are available in a variety of sizes to provide securement for IV lines/dressing for adults and pediatric patients. These dressing retainers offer compression and support to hold tubing firmly in place without the need for tape or gauze. They eliminate skin stripping and excoriation caused by tape removal and are very effective when used for burn care, surgery, post-op dressing changes, donor wound graft sites, daily dressing changes, EKG stress testing and sleep studies.

Item #	Description	Size	UOM
IMS03	IMed Elastic Net Retainer Dressing	Adult: small hand or foot Child: arm	1 Roll/Box
IMS04	IMed Elastic Net Retainer Dressing	Adult: medium hand or foot Child: medium arm	1 Roll/Box

EZ FLOW™

ELASTOMERIC PUMP

EZ-FLOW™ Elastomeric Pumps are a convenient alternative to electronic infusion pumps. The EZ-FLOW™ offers a safe and effective way to deliver medications while allowing patients freedom in their day-to-day lives without the worry of programming and battery power.

PRODUCT FEATURES:

- Latex-free
- DEHP-free
- Single-use only
- Filter to eliminate particles (1.2 microns) and air (0.03 microns)
- Available in 50mL/hour - 500mL/hour flow rates
- Color-coded in multiple locations for easily identifiable flow rate

Item #	Fill Volume/Flow Rate	UOM

IMed Products™ Dual-Function Dead End Caps feature a male luer on one end and a female luer on the other, for safe and secure connection.

PRODUCT FEATURES:

- Latex-free
- DEHP-free
- PVC-free
- BPA-free
- Meets ISO 80369 standard
- Sterile-packed

Item #	Description	UOM
IM51003	IMed Sterile End Cap, Red	100/Case

IMed Products™ Ethyl Vinyl Acetate (EVA) 2-port bags are made with an EVA material that does not contain harmful plasticizers such as DEHP, which can leach into TPN solutions. EVA is more durable for reduced breakage, more stable for improved safety and more transparent for improved admixture inspection.

PRODUCT FEATURES:

- Latex-free
- DEHP-free
- PVC ports
- Available in multiple sizes: 150mL - 1000mL

IM68055	IMed EVA Bag, 2-Ports	1000mL	50/Case

IMed Products™ Ethyl Vinyl Acetate (EVA) gravity bags are made with an EVA material that does not contain harmful plasticizers such as DEHP, which can leach into TPN solutions. EVA is more durable for reduced breakage, more stable for improved safety and more transparent for improved admixture inspection.

PRODUCT FEATURES:

- Latex-free
- DEHP-free
- Detachable 2 or 3 leg transfer sets
- PVC ports and tubing
- Available in 2 or 3 leg versions
- Fill legs have vented spikes
- Cap for closing fill leg
- Available in multiple sizes: 1000mL - 4000mL

IMed Products Alcohol Prep Pads, a reliable solution for safe and effective skin preparation before injections or venipuncture. These premium-quality pads are saturated with 70% isopropyl alcohol, effectively combating bacteria and germs to reduce the risk of contamination. The non-woven prep pads are known for their exceptional softness and absorbency, ensuring enhanced performance. Each pad is designed for single use and is securely sealed in sterile pouches, ensuring the highest standards of hygiene.

PRODUCT FEATURES:

- Sterile
- 2-ply
- Available in medium and large sizes
- Contains 70% isopropyl alcohol

Item #	Description	UOM
IM25092	Sterile Alcohol Prep Pads, Medium	20 Boxes/200; 4000/Case
IM25093	Sterile Alcohol Prep Pads, Large	40 Boxes/100; 4000/Case

The Cleo® 90 infusion system is a single-use disposable system to be used in a variety of infusion therapies (including insulin). This system makes insertions quick and convenient in the home. The enclosed needle in the cannula retracts automatically into the housing after insertion, reducing the risk of accidental needle-stick injuries. The tubing can be connected with a single motion using just one hand, and can be used with any pump that has a luer fitting.

PRODUCT FEATURES:

- Hypoallergenic dressing - The small, transparent adhesive dressing breathes yet keeps water out – and stays in place with less tape. Its patented release tab makes removal easy
- Standard luer connection
- Flexible 360° connection - Ability to rotate the connection of the tubing 360°, which offers even more freedom and flexibility. The Flex Attach™ 360° site connection provides on-site rotation offering greater flexibility

Item #	Description	UOM
IM53080	Cleo® SubQ Infusion Cannula, 6mm	50/Box
IM53081	Cleo® SubQ Infusion Cannula, 9mm	50/Box

Respiratory

IMed Products™ Filters are single-use devices indicated for patient during the delivery of ventilator gasses. They provide filtration for reducing possible cross contamination between patient and equipment. This filter is for use in hospital, ICU, anesthesia, respiratory therapy, during transport, and with resuscitators. These filters can be used on adult patients and are indicated for use by qualified medical personnel only. These are designed for disposable use and should be changed every 24 hours.
