Biomedical Services Features & Benefits

With patients and providers in mind,
IMS has you covered.

Asset Tracking

Medtrakk is a real-time tracking system that can be used to monitor the usage, status, and location of your mobile assets. Maximize inventory utilization and staff productivity while decreasing your operating expenditures.

Track your assets using these five simple steps:

Select the asset you would like to track

Choose a site, patient, or location to assign the asset to

Track where your asset is located and when it's ready to be returned

Return to IMS for biomedical services

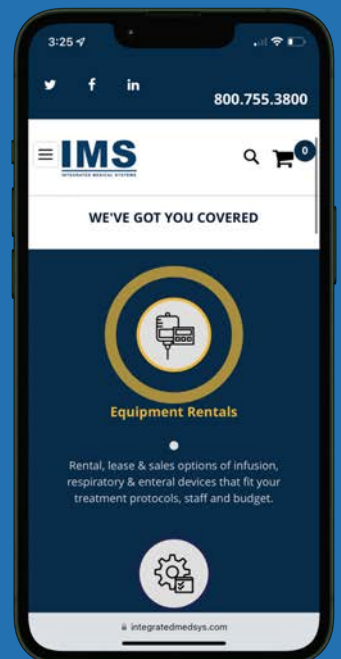

Receive patient-ready assets
