

If you're going to focus
on tomorrow, you need
someone to take care of
today.

BrightStarCare®

Medical Staffing | Home Care | Personal Care
Short-Term Transitional Care | Skilled Care

So, who is BrightStar Care®?

We're a provider of high-quality home care, assisted living, and staffing support to those who need it most. Whether it's support for a loved one or an organization, we're here to go above and beyond. We call it "A Higher Standard."

We make getting the care solutions you need *simple*.

With one point of contact for corporate partnerships and national accounts, you won't waste time and effort chasing down the support you need.

Our centralized management center is your single source for project startup, contracts, and ongoing maintenance.

Reach out to our national accounts team today at brightstarintake@brightstarcare.com or 866.618.7827.

We care about what you care about: Simplicity. Quality. Reliability.

Infusion

To continue providing the highest quality care, we provide in-home infusion visits to administer a variety of drugs by specially trained infusion nurses. We also offer teach-and-train visits for individuals learning to self-administer injections.

Central Intake

With our track record, we understand care needs of any kind, in any circumstance. That means we can place the right people in the right position and get it right the first time.

Fast Case Fulfillment

You're a priority. And so is today. So it's not only Centralized Intake — it's expedited response. And that kind of value is a combination of experience and intuition.

Award-Winning Care

Many of our franchises have earned a variety of Home Care Pulse Best of Home Care Awards for 2023. Plus, each independently owned and operated BrightStar® Home Care location is required to achieve and maintain Joint Commission accreditation.

What sets us apart from anyone...

Whatever the category of care and whatever the specific services might be, providing care isn't just about the big things. It's also about the little things, like our ability to provide ease of access and a seamless process.

Let's start a conversation about care solutions for today *and* tomorrow.
